

Mostafa Mahmoud Gheda

Business Intelligence Developer

Cairo, Egypt | mgheda50@gmail.com | +201551714019

[Portfolio](#) | [LinkedIn](#)

Military status: Exempted

Profile

Detail-oriented business intelligence developer with 1+ year of experience in business intelligence and data analysis. Proficient in analysing complex data, generating insights, and delivering data-driven solutions that empower stakeholders, enhance decision-making, and drive business growth.

EDUCATION

- Bachelor of Computer and Information Science (Computer Science Major)

Mansoura University
Sep 2018 – May 2022

- Scholarship – Business Intelligence Developer Track

Information Technology Institute (ITI)

Experience

Data Analyst

Shawahid Industrial Roads

May 2024 – Dec 2025

- Developed and optimized data models to support efficient analysis and reporting using Power BI.
- Designed and delivered comprehensive reports and dashboards for client and product data, enabling data-driven decision-making.
- Enhanced existing reports to improve accuracy, performance, and visual presentation.
- Automated and delivered ad-hoc reports to meet specific and evolving business requirements.
- Engaged directly with clients to gather requirements and deliver tailored pricing solutions aligned with business needs.
- Collaborated with cross-functional teams to drive improvements in sales performance and enhance overall client satisfaction.

Skills

- | | |
|---|-------------------------------------|
| • SQL | • Extract, Transform and load (ETL) |
| • Database (SQL Server) | • Data Modeling |
| • SQL Server Integration Service (SSIS) | • Data Warehousing |
| • Python | • Data Cleaning |
| • Power BI | • Statistical Analysis |
| • Excel | • Exploratory Data Analysis (EDA) |

PROJECTS

- **Marketing Campaigns EDA | Python (Pandas, NumPy, Matplotlib, Seaborn)** [\(GitHub Link\)](#)
 - Cleaned a messy marketing dataset by fixing inconsistent columns, wrong data types, and impossible values across multiple columns.
 - Converted all financial data into USD and recalculated key metrics (CTR, CPC, CPA, ROAS, ROI) from scratch after cleaning.
 - Fixed inverted date pairs, removed outliers using the IQR method, and created a campaign duration feature.
 - Built 10+ charts to uncover performance trends across channels, regions, segments, and campaign managers.
 - Delivered clean analysis-ready dataset with reliable metrics and actionable marketing insights.

- **Grocery Sales DWH | Python (Pandas, SQLAlchemy), SQL Server** [\(GitHub Link\)](#)
 - Designed dimensional modeling (star schema data warehouse) for grocery sales data.
 - Developed end-to-end ETL pipeline that transfers data from staging tables in SQL server to DWH.
 - Implemented slowly changing dimension (SCD) type 1 and type 2 to maintain historical data.
 - Implemented data transformations including type casting, null handling, and business logic calculations.
 - Created automated fact table population with surrogate key lookups and business calculations.
 - Developed an incremental loading strategy to handle almost 7M records.
 - Reduced data processing time through optimized merge statements and staging tables

- **CRM Sales Opportunities | Power BI**
 - Optimized star schema data model after importing and transforming raw CRM data, improving query performance.
 - Developed a visually appealing dashboard featuring key KPIs including opportunity value, win/loss rate and product category performance.
 - Analyzed the teams' performance and compared their performance with each other and team members.
 - Compared sales in different time periods over the years.

- **Clients and products Sales | Power BI, Excel**
 - Organized products with common characteristics into categories.
 - Developed appropriate data model for clients and products sales data.
 - Implemented customer and product segmentation based on some factors like total sales and total orders.
 - Deployed an interactive dashboard to identify sales performance and diagnosed underperforming products.
 - Contributed business decisions by providing some tricks to improve sales performance and customer satisfaction.

Certifications

- Microsoft Certified: Power Bi Data Analyst Associate (PL 300)
